

CASE STUDY

310 Wharfedale Road

Brief

Works comprised the dilapidation and refurbishment of the existing industrial unit, incorporating warehouse space and office accommodation.

Project info

A demolished mezzanine, two new entrances and total redecoration.

Enabling works included the soft strip of all office accommodation, demolition of the existing mezzanine structure and mechanical and electrical strip out. Refurbishment of the unit included the formation of a new main entrance and reception area, and associated cladding repairs.

We constructed a new entrance ramp into the warehouse and new roller shutter doors, made mechanical and electrical alterations and installations, also installing new floor coverings, ceilings and redecorations throughout.
