

CASE STUDY

# Christie's, Park Royal

**Brief**

Completed on behalf of the well known auction house Christie's, this project involved the fit out of an industrial unit to create a state of the art, pre-sale storage facility.

**Project info**

Highly specific studios, archives and storage areas for auctioneers, Christie's.

Our works incorporated reconfiguration of the space to provide facilities for a photography studio, specialised temperature controlled archives and storage areas. The existing office accommodation received a CAT B fit out including the installation of new tea points and WC facilities.

A new reception area was formed and, externally, new secure fencing and access barriers were installed.
